

Practical - 10

Aim: Write a PHP program to drop table using MySQL.

Solution:

```
<form method="post">
Enter a UserName: <input type="text" name="username"/><br>
Enter a Password: <input type="text" name="password"/><br>
Enter a Database name: <input type="text" name="dbname"/><br>
Enter a Table name: <input type="text" name="tbname"/><br>
<button type="submit">Submit</button>
</form>
<?php
    if($_POST)
    {
        $servername = "localhost";
        $username = $_POST['username'];
        $password = $_POST['password'];
        $dbname = $_POST['dbname'];
        $tbname = $_POST['tbname'];
        $conn = new mysqli($servername, $username, $password, $dbname);
        if ($conn->connect_error)
        {
            die("Connection failed: " . $conn->connect_error);
        }
        echo "Connected successfully!!<br>";
        $sql = "DROP TABLE $tbname";
        if ($conn->query($sql) === TRUE)
        {
            echo "Table Deleted successfully!!";
        } else
        {
            echo "Error deleting table: " . $conn->error;
        }
        $conn->close();
    }
?>
```
