

Practical - 7

Aim: Write a PHP program to create and drop a database using MySQL.

Solution:

```
<form method="post">
Enter a UserName: <input type="text" name="username"/><br>
Enter a Password: <input type="text" name="password"/><br>
Enter a Database name: <input type="text" name="dbname"/><br>
<button type="submit">Submit</button>
</form>
<?php
  if($_POST)
  {
    $servername = "localhost";
    $username = $_POST['username'];
    $password = $_POST['password'];
    $dbname = $_POST['dbname'];
    $conn = new mysqli($servername, $username, $password);
    if ($conn->connect_error) {
      die("Connection failed: " . $conn->connect_error);
    }
    echo "Connected successfully!!<br>";
    $sql = "CREATE DATABASE $dbname";
    if ($conn->query($sql) === TRUE)
      echo "Database created successfully!!<br>";
    }
    else
      echo "Error creating database: " . $conn->error;
    }
    $sql = "DROP DATABASE $dbname";
    if ($conn->query($sql) === TRUE)
```

IT WORKSHOP 2101201049

```
echo "Database deleted successfully!!<br>";
}
else
{
    echo "Error creating database: " . $conn->error;
}
$conn->close();
}
?>
```

OUTPUT:
